

FOR ENTERPRISES

Control Center for Mobile Enterprise

Automated Mobility Management (AMM)

“Control Center has improved our operational efficiency and we expect it to become our one stop shop for mobility management.”

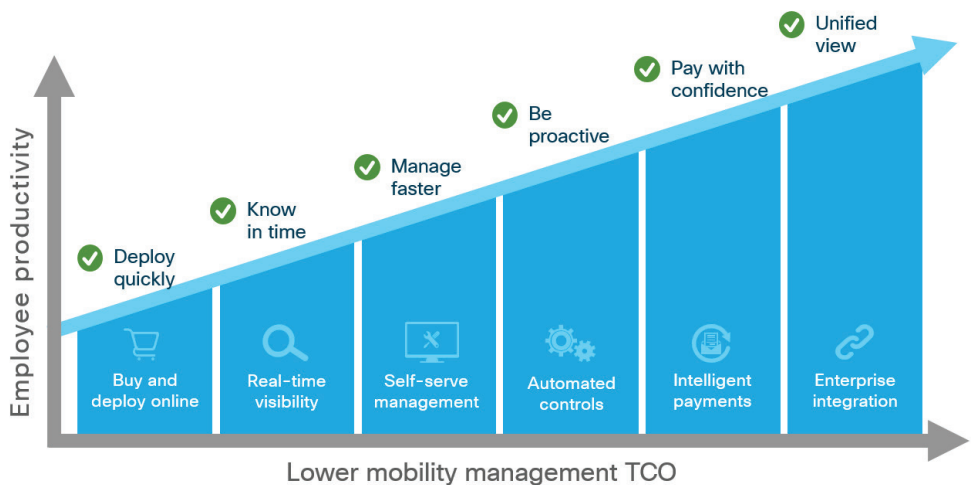

– Carole St. Arnaud,
Procurement Administrator,
QuadReal Property Group

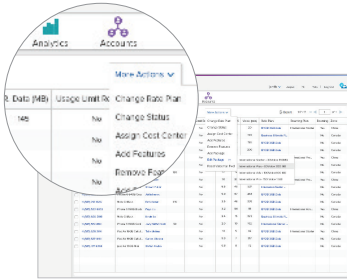

Transform how you manage your mobile workforce

Control Center for Mobile Enterprise enables you to automate how you manage your mobile services, devices, and employees. Gain fast, efficient control to replace costly manual processes with this Automated Mobility Management (AMM) platform.

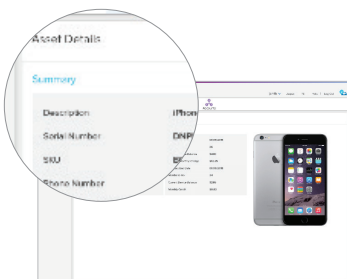

Directly integrated with your mobile service provider’s systems, Control Center for Mobile Enterprise gives you instant visibility and comprehensive self-serve tools. Streamline operations, reduce support calls and prevent overages – to lower your mobility total cost of ownership.

Control Center for Mobile Enterprise automates every stage of mobility management

Gain real-time visibility and control over mobile usage and services

Track and manage all your devices from a single platform

Customize reports to better understand your usage and costs

Reduce your mobility total cost of ownership

Control Center for Mobile Enterprise enables you to automate mobility management for your services, devices and employees.

- **Faster device deployment** – Streamline the various steps of device deployment. Quickly buy devices online, provision plans, enroll into MDM platforms and auto-activate devices – ensuring employees receive their devices without delay.
- **Real-time usage visibility** – Instantly view voice, SMS and data usage for every mobile device, anywhere. Real-time usage visibility and alerts during the billing cycle enable you to take immediate action, such as upgrading to a travel plan to avoid roaming overages.
- **Self-serve management** – Increase efficiency with self-serve control over your services and devices. Track everything from subscription terms and device details, to assigned employees. With just a few clicks, you can change rate plans, suspend subscriptions, swap SIMs, upgrade devices, recall unused devices, and more.
- **Automated cost control** – Eliminate surprise charges and know exactly what will be spent each month. Proactively create and enforce policies that automatically limit usage and dynamically change rate plans to ensure predictable bills.
- **Intelligent payments** – Simplify spend analysis and payments with easy online tools to analyze monthly telecom costs, submit billing disputes, and auto-pay bills.
- **Easy enterprise integration** – Leverage a robust API library to easily integrate with any existing enterprise system. Ensure accurate information across CRM, ERP, MDM, TEM, and analytics systems.

Leverage a trusted global platform

Cisco Jasper is a global Internet of Things (IoT) platform leader. For more than a decade we have been helping companies launch, manage and monetize connected IoT services to drive business transformation and deliver innovative connected services.
